1. Going through the paper

- Compartments and consumption/ flows are exchanges among compartments
 - Separate our definitions from green/blue water
- Should papers been presented mainly in introduction? No clear opinion

2. Next steps

- Montse will update paper send again a third version of section by end of this week
 - Get feedback (together with introduction)
 - Depending on article length

Focus until end 2016 on section 3 (FF model description) and next meeting only with members contributing to this section

3. Other points

General WULCA EQ meeting in January/February 2017 (Stephan sends Doodle)
